

WNPPC2020 - 57th Winter Nuclear Particle Physics Conference

Thursday, 13 February 2020 - Sunday, 16 February 2020

Banff Centre

Book of Abstracts

Contents

Conference Opening	1
Higgs boson physics and upgrade work with ATLAS at the Large Hadron Collider	1
Analysis of Higgs boson decays to two W bosons with the ATLAS experiment	1
Search for mono-Z signature dark matter with the ATLAS detector at the LHC	1
Event Reconstruction using the Global Particle Flow Algorithm for the ATLAS Experiment	1
From Quarks to Neutrinos	1
The SNO+ Scintillator Fill	1
Ba Daughter Tagging as a Method for Background Rejection Technique for nEXO	2
A novel technique for ultracold neutron transmission measurements	2
The NEWS-G light Dark Matter search experiment: Current status and preparation for SNOLAB	2
Environmental Magnetic Fields for the Neutron Electric Dipole Moment Experiment at TRIUMF	2
Decreasing the measurement time of the neutron electric dipole moment experiment at TRIUMF	2
Simulation and Data Comparison of Ultracold Neutron Experiments for TUCAN Collabo- ration	2
Radon mitigation for the NEWS-G Dark Matter Detector	3
Propagation of Muons at SNOLAB	3
Search for dark matter and neutrinos with the Scintillating Bubble Chamber (SBC)	3
MoEDAL-MAPP Detector Physics Performance Benchmarks	3
Multi-messenger astrophysics	3
Development of multi-detector systems for gamma-ray coincidence measurements	3
Ion transport simulations for the TITAN experiment	4

Investigation of resonance states in ^{11}Li	4
Correcting Signal Saturation in DEAP-3600	4
Testing exotic cosmology models with LISA	4
Dark Matter Detection with SuperCDMS	4
The search for CLFV at BELLE II	4
Dark Matter: Direct Detection Searches	4
Simulating a new complementary detector for DESCANT	5
Status of DEAP-3600 at SNOLAB	5
Explosion Energies, Ages and Densities of Galactic Supernovae	5
Nonperturbative Extraction of the Effective Mass in Neutron Matter	5
Charged pi-Meson Studies at Jefferson Lab	5
Kaon Electromagnetic Form Factor	5
Deep Exclusive π^- Production with SoLID	6
PICO Bubble Chambers: Past, Present, and Future	6
Precision Measurements on Antihydrogen using the ALPHA-g Apparatus	6
A Cosmic Ray Veto System for the ALPHA-g Experiment	6
Magnetometry for Gravitational Measurements of Antihydrogen with ALPHA-g	6
Recent Studies of Astrophysical Reactions at ISAC	6
Primary electron drift time simulation in spherical proportional counter	6
Decay of a bound muon to a bound electron	7
Applied Quantum Annealing for Track Reconstruction in HEP	7
From odd-even staggering to the pairing gap in neutron matter	7
Nuclear Recoil Calibration at TUNL	7
Analysis of electron drift properties and fluctuations for NEWS-G	7
Investigation of wavelength shifting materials in an active helium target	7
The Intermediate Water Cherenkov Detector for Hyper-Kamiokande	8
High-Precision Half-life Measurement of ^{14}O	8
High-Precision Branching Ratio Measurement and Spin Assignment Implications for ^{62}Ga Superaligned Beta Decay	8
Dipositronium annihilation into a single photon	8

Single photon decay of the positronium ion	8
Student prizes / conference close	8

Feb. 13 Evening Session / 51

Conference Opening

Corresponding Author: bl.jamieson@uwinnipeg.ca

Feb. 13 Evening Session / 52

Higgs boson physics and upgrade work with ATLAS at the Large Hadron Collider

Corresponding Author: claire.david@cern.ch

Feb. 13 Evening Session / 53

Analysis of Higgs boson decays to two W bosons with the ATLAS experiment

Corresponding Author: benjamin.jaeger@posteo.de

Feb. 13 Evening Session / 54

Search for mono-Z signature dark matter with the ATLAS detector at the LHC

Corresponding Author: s.taylor1484@gmail.com

Feb. 13 Evening Session / 55

Event Reconstruction using the Global Particle Flow Algorithm for the ATLAS Experiment

Corresponding Author: lauramiller@cmail.carleton.ca

Feb. 14 Morning Session / 56

From Quarks to Neutrinos

Corresponding Author: nikolina.ilic@cern.ch

Feb. 14 Morning Session / 57

The SNO+ Scintillator Fill

Corresponding Author: benjamin.tam@queensu.ca

Feb. 14 Morning Session / 58

Ba Daughter Tagging as a Method for Background Rejection Technique for nEXO

Corresponding Author: christopher.chambers@mcgill.ca

Feb. 14 Morning Session / 59

A novel technique for ultracold neutron transmission measurements

Corresponding Author: svanbergen@triumf.ca

Feb. 14 Morning Session / 60

The NEWS-G light Dark Matter search experiment: Current status and preparation for SNOLAB

Corresponding Author: ddurnfor@ualberta.ca

Feb. 14 Morning Session / 61

Environmental Magnetic Fields for the Neutron Electric Dipole Moment Experiment at TRIUMF

Corresponding Author: lavvafm@myumanitoba.ca

Feb. 14 Morning Session / 62

Decreasing the measurement time of the neutron electric dipole moment experiment at TRIUMF

Corresponding Author: steve.sidhu26@gmail.com

Feb. 14 Morning Session / 63

Simulation and Data Comparison of Ultracold Neutron Experiments for TUCAN Collaboration

Corresponding Author: beryl.bell@mail.mcgill.ca

Feb. 14 Morning Session / 64

Radon mitigation for the NEWS-G Dark Matter Detector

Corresponding Author: pobrien@ualberta.ca

Feb. 14 Morning Session / 65

Propagation of Muons at SNOLAB

Corresponding Author: wwoodley@ualberta.ca

Feb. 14 Morning Session / 66

Search for dark matter and neutrinos with the Scintillating Bubble Chamber (SBC)

Corresponding Author: sumanta@ualberta.ca

Feb. 14 Morning Session / 67

MoEDAL-MAPP Detector Physics Performance Benchmarks

Corresponding Author: staelens@ualberta.ca

Feb. 14 Evening Session / 68

Multi-messenger astrophysics

Corresponding Author: dsiegel@perimeterinstitute.ca

Feb. 14 Evening Session / 69

Development of multi-detector systems for gamma-ray coincidence measurements

Corresponding Author: mgascoin@sfu.ca

Feb. 14 Evening Session / 70

Ion transport simulations for the TITAN experiment

Corresponding Author: ajavaji@triumf.ca

Feb. 14 Evening Session / 71

Investigation of resonance states in ^{11}Li

Corresponding Author: mukh.pawar@gmail.com

Feb. 14 Evening Session / 72

Correcting Signal Saturation in DEAP-3600

Corresponding Author: joseph.mclaughlin.2018@live.rhul.ac.uk

Feb. 14 Evening Session / 73

Testing exotic cosmology models with LISA

Corresponding Author: mcorman@perimeterinstitute.ca

Feb. 14 Evening Session / 74

Dark Matter Detection with SuperCDMS

Corresponding Author: lvsb@phas.ubc.ca

Feb. 14 Evening Session / 75

The search for CLFV at BELLE II

Corresponding Author: trshillington@hep.physics.mcgill.ca

Feb. 15 Morning Session / 76

Dark Matter: Direct Detection Searches

Corresponding Author: mdiamond@physics.utoronto.ca

Feb. 15 Morning Session / 77

Simulating a new complementary detector for DESCANT

Corresponding Author: hbidaman@uoguelph.ca

Feb. 15 Morning Session / 78

Status of DEAP-3600 at SNOLAB

Corresponding Author: sumanta@ualberta.ca

Feb. 15 Morning Session / 79

Explosion Energies, Ages and Densities of Galactic Supernovae

Corresponding Author: Leahy@ucalgary.ca

Feb. 15 Morning Session / 80

Nonperturbative Extraction of the Effective Mass in Neutron Matter

Corresponding Author: nismail@uoguelph.ca

Feb. 15 Morning Session / 81

Charged pi-Meson Studies at Jefferson Lab

Corresponding Author: auu001@uregina.ca

Feb. 15 Morning Session / 82

Kaon Electromagnetic Form Factor

Corresponding Author: vijay36361@gmail.com

Feb. 15 Morning Session / 83

Deep Exclusive π^- Production with SoLID

Corresponding Author: stephen.kay@uregina.ca

Feb. 15 Morning Session / 84

PICO Bubble Chambers: Past, Present, and Future

Corresponding Author: c.moore@queensu.ca

Feb. 15 Morning Session / 85

Precision Measurements on Antihydrogen using the ALPHA-g Apparatus

Corresponding Author: pooja.woosaree@ucalgary.ca

Feb. 15 Morning Session / 86

A Cosmic Ray Veto System for the ALPHA-g Experiment

Corresponding Author: gsmith@triumf.ca

Feb. 15 Morning Session / 87

Magnetometry for Gravitational Measurements of Antihydrogen with ALPHA-g

Corresponding Author: nevetts@phas.ubc.ca

Feb. 15 Evening Session / 88

Recent Studies of Astrophysical Reactions at ISAC

Corresponding Author: mwilliams@triumf.ca

Feb. 15 Evening Session / 89

Primary electron drift time simulation in spherical proportional counter

Corresponding Author: ydeng6@ualberta.ca

Feb. 15 Evening Session / 90

Decay of a bound muon to a bound electron

Corresponding Author: maslam@ualberta.ca

Feb. 15 Evening Session / 91

Applied Quantum Annealing for Track Re- construction in HEP

Corresponding Author: psreid@sfu.ca

Feb. 15 Evening Session / 92

From odd-even staggering to the pairing gap in neutron matter

Corresponding Author: gpalkano@uoguelph.ca

Feb. 15 Evening Session / 93

Nuclear Recoil Calibration at TUNL

Corresponding Author: francois.de.brienne@umontreal.ca

Feb. 15 Evening Session / 94

Analysis of electron drift properties and fluc- tuations for NEWS- G

Corresponding Author: jeanmarie.coquillat@queensu.ca

Feb. 15 Evening Session / 95

Investigation of wavelength shifting materi- als in an active he- lium target

Corresponding Author: msperry@mta.ca

Feb. 16 Morning Session / 96

The Intermediate Water Cherenkov Detector for Hyper-Kamiokande

Corresponding Author: mpavin@triumf.ca

Feb. 16 Morning Session / 97

High-Precision Half-life Measurement of ^{140}La

Corresponding Author: ssw047@uregina.ca

Feb. 16 Morning Session / 98

High-Precision Branching Ratio Measurement and Spin Assignment Implications for ^{62}Ga Superalloyed Beta Decay

Corresponding Author: amacle02@uoguelph.ca

Feb. 16 Morning Session / 99

Dipositronium annihilation into a single photon

Corresponding Author: mmubashe@ualberta.ca

Feb. 16 Morning Session / 100

Single photon decay of the positronium ion

Corresponding Author: samiur.mir@ualberta.ca

Feb. 16 Morning Session / 101

Student prizes / conference close

Corresponding Author: bl.jamieson@uwinnipeg.ca
