Winter Nuclear Particle Physics (WNPPC) 2018

February 15, 2018 - February 18, 2018

Scientific Program

The Winter Nuclear and Particle Physics Conference is a national meeting for the Canadian subatomic physics community, with a special focus on providing a forum for junior researchers (students and postdocs) and interaction with groups across Canada. The 2018 meeting is being organised by the Carleton University and SNOLAB, and as usual will feature sessions focusing on the research areas of interest to the Canadian community (both experimental and theoretical). There will be a number of invited talks by experts in:

- Electroweak and Higgs physics
- Neutrino properties
- QCD and hadrons
- Physics beyond the Standard Model
- Nuclear structure
- Nuclear and particle astrophysics.
