

New Scientific Opportunities with the TRIUMF ARIEL e-linac

Contribution ID: 7

Type: not specified

Status for beam and perspectives for applications at the SRF photoinjector of the Sealab facility

Wednesday, May 25, 2022 2:00 PM (30 minutes)

In the first part the talk rationalizes the SRF photoinjector design of the bERLinPro/SEALab facility at HZB. A brief history ending at the current status of the experiments is given. The talk concludes then with scientific opportunities currently under consideration for beam applications.
