

## New Scientific Opportunities with the TRIUMF ARIEL e-linac

Contribution ID: 7

Type: not specified

### Status for beam and perspectives for applications at the SRF photoinjector of the Sealab facility

*Wednesday, 25 May 2022 14:00 (30 minutes)*

In the first part the talk rationalizes the SRF photoinjector design of the bERLinPro/SEALab facility at HZB. A brief history ending at the current status of the experiments is given. The talk concludes then with scientific opportunities currently under consideration for beam applications.
