

PAINT2025 - Workshop on Progress in Ab Initio Nuclear Theory

Tuesday, 25 February 2025 - Friday, 28 February 2025

TRIUMF Auditorium

Book of Abstracts

Contents

Exploring Strong Interactions in the Universe	1
Introduction	1
Chiral nuclear interactions: New developments	1
Chiral interactions with gradient flow regulator	1
N3LO_Texas —Towards more accurate chiral interactions	1
Explicit Estimation of Truncation Uncertainties in Chiral EFT	1
Inferring three-nucleon couplings from multi-messenger neutron-star observations	1
An ab initio framework for the modelling of electroweak processes in light nuclei	1
Ab initio nuclear corrections to muonic atoms: extracting nuclear radii from precision spectroscopy	2
Extending the reach of the no-core shell model	2
Proton-neutron deformation, triaxiality, and subshell structure ab initio	2
${}^7\text{Li}$ in the no-core shell model with continuum framework with coupling of mass partition	2
Aspects of Four-Body Systems in Contact EFT	2
Update on IMSRG Developments	2
Explorations with the In-Medium No-core Shell Model	2
Symmetry breaking: spurious and spontaneous	2
Dawn of nuclear clock in the search of new physics: prospects for nuclear physics	3
Recent advances in precise forbidden β -decays for BSM searches	3
Quantifying and reducing uncertainties in ab initio calculations for new physics studies	3
Enhancing NCSM Calculations via Artificial Neural Networks	3
Ab initio computations of deformed nuclei	3
Exploring nuclear collectivity within the IMSRG	3

Capturing many-body correlations at polynomial cost	3
Towards ab initio calculations for nucleosynthesis	3
Ab initio nuclear mass predictions at N=126 and the third r-process abundance peak	4
Radiative Corrections for Superallowed Beta Decays Transition Densities with Coupled-Cluster Theory	4
Diagrammatic Monte Carlo at T=0 and recent results with SCGF	4
Evidence for multimodal superfluidity of neutrons	4
Computing nuclear responses in time-dependent coupled-cluster theory	4
Putting the subleading three-nucleon force to use	4
Structure and electric dipole response of open-shell nuclei from coupled-cluster theory	4
Corrections to neutrinoless double-beta decay evaluated up to N2LO	4
Attention everyone! I have gone completely BANNANE!	5
Frontiers in Statistical Methods for Nuclear Physics	5
Multi-reference perturbation theory for open-shell nuclei	5
Computing nuclear responses in time-dependent coupled-cluster theory	5
A new class of three-nucleon forces in Chiral EFT	5
TBA	5
Capturing many-body correlations at polynomial cost	5
Tensor-factorized Bogoliubov many-body perturbation theory	5
Exploring new chiral interactions at N2LO and N3LO	6
Uncertainty quantification with low-resolution nuclear interactions	6
Precision NCSM Calculations of Charge Radii	6
NCSM and Neural Networks for M3 Transition Strength in 10-B	6
Many-body emulators for nuclear structure	6
Two-body currents at finite momentum transfer and applications to M1 transitions	6
Transitions in a proton-neutron shell model approximation	6
Perturbative treatment of non-local operators in quantum Monte Carlo	7
Collective Excitations in the In-Medium (S)RPA	7
Active-Space Decoupling in the Multi-Reference IM-SRG	7

Ab initio nuclear theory calculations at neutron number $N=126$ change predictions for heavy element production in neutron star mergers	7
Equation of state and Fermi liquid properties of dense matter based on chiral EFT interactions	7
Leveraging the cost multi-reference methods for the nuclear many-body problem	7
What is there inside a BANNANE: ML Tools for Global Emulation	7
Sterile and Heavy Neutrino Contributions to Neutrinoless Double-Beta Decay	7
https://docs.google.com/spreadsheets/d/1H1zuj9reo9Vwgz5p-pA3zD0KHWfdK6oXKns1dLOVHx8/edit?usp=sharing	8

Colloquium / 1

Exploring Strong Interactions in the Universe

Morning Talks / 2

Introduction

Morning Talks / 3

Chiral nuclear interactions: New developments

Morning Talks / 4

Chiral interactions with gradient flow regulator

Morning Talks / 5

N3LO_Texas —Towards more accurate chiral interactions

Morning Talks / 6

Explicit Estimation of Truncation Uncertainties in Chiral EFT

Morning Talks / 7

Inferring three-nucleon couplings from multi-messenger neutron-star observations

Afternoon Talks / 8

An ab initio framework for the modelling of electroweak processes in light nuclei

Afternoon Talks / 9

Ab initio nuclear corrections to muonic atoms: extracting nuclear radii from precision spectroscopy

Afternoon Talks / 10

Extending the reach of the no-core shell model

Afternoon Talks / 11

Proton-neutron deformation, triaxiality, and subshell structure ab initio

Afternoon Talks / 12

${}^7\text{Li}$ in the no-core shell model with continuum framework with coupling of mass partition

Afternoon Talks / 13

Aspects of Four-Body Systems in Contact EFT

Morning Talks / 14

Update on IMSRG Developments

Morning Talks / 15

Explorations with the In-Medium No-core Shell Model

Morning Talks / 16

Symmetry breaking: spurious and spontaneous

Morning Talks / 17

Dawn of nuclear clock in the search of new physics: prospects for nuclear physics

Morning Talks / 18

Recent advances in precise forbidden β -decays for BSM searches

Morning Talks / 19

Quantifying and reducing uncertainties in ab initio calculations for new physics studies

Afternoon Talks / 20

Enhancing NCSM Calculations via Artificial Neural Networks

Afternoon Talks / 21

Ab initio computations of deformed nuclei

Afternoon Talks / 22

Exploring nuclear collectivity within the IMSRG

Afternoon Talks / 23

Capturing many-body correlations at polynomial cost

Morning Talks / 24

Towards ab initio calculations for nucleosynthesis

Morning Talks / 25

Ab initio nuclear mass predictions at $N=126$ and the third r-process abundance peak

Morning Talks / 26

Radiative Corrections for Superallowed Beta Decays Transition Densities with Coupled-Cluster Theory

Morning Talks / 27

Diagrammatic Monte Carlo at $T=0$ and recent results with SCGF

Morning Talks / 28

Evidence for multimodal superfluidity of neutrons

Morning Talks / 29

Computing nuclear responses in time-dependent coupled-cluster theory

Morning Talks / 30

Putting the subleading three-nucleon force to use

Morning Talks / 31

Structure and electric dipole response of open-shell nuclei from coupled-cluster theory

Morning Talks / 32

Corrections to neutrinoless double-beta decay evaluated up to N2LO

Morning Talks / 33

Attention everyone! I have gone completely BANNANE!

Author: Antoine Belley^{None}

Morning Talks / 34

Frontiers in Statistical Methods for Nuclear Physics

Afternoon Talks / 35

Multi-reference perturbation theory for open-shell nuclei

Afternoon Talks / 36

Computing nuclear responses in time-dependent coupled-cluster theory

Morning Talks / 37

A new class of three-nucleon forces in Chiral EFT

Morning Talks / 38

TBA

Morning Talks / 39

Capturing many-body correlations at polynomial cost

Morning Talks / 40

Tensor-factorized Bogoliubov many-body perturbation theory

Poster Jamboree / 41

Exploring new chiral interactions at N2LO and N3LO

Poster Jamboree / 42

Uncertainty quantification with low-resolution nuclear interactions

Poster Jamboree / 43

Precision NCSM Calculations of Charge Radii

Poster Jamboree / 44

NCSM and Neural Networks for M3 Transition Strength in 10-B

Poster Jamboree / 45

Many-body emulators for nuclear structure

Poster Jamboree / 46

Two-body currents at finite momentum transfer and applications to M1 transitions

Poster Jamboree / 47

Transitions in a proton-neutron shell model approximation

Poster Jamboree / 48

Perturbative treatment of non-local operators in quantum Monte Carlo

Poster Jamboree / 49

Collective Excitations in the In-Medium (S)RPA

Poster Jamboree / 50

Active-Space Decoupling in the Multi-Reference IM-SRG

Poster Jamboree / 51

Ab initio nuclear theory calculations at neutron number $N=126$ change predictions for heavy element production in neutron star mergers

Poster Jamboree / 52

Equation of state and Fermi liquid properties of dense matter based on chiral EFT interactions

Poster Jamboree / 53

Leveraging the cost multi-reference methods for the nuclear many-body problem

Poster Jamboree / 54

What is there inside a BANNANE: ML Tools for Global Emulation

Poster Jamboree / 55

Sterile and Heavy Neutrino Contributions to Neutrinoless Double-Beta Decay
