

6th RaDIATE Collaboration Meeting

Tuesday, 10 December 2019

5th oral session: Radiation Damage Studies II (11:30 - 13:30)

-Conveners: Marco Calviani

time	[id] title	presenter
11:30	[46] Status of Ion Beam Irradiation at HIT Facility	Dr WAKAI, Eiichi
11:55	[9] Blisters study in tungsten irradiated by MeV protons: Fracture morphology and mechanical properties	Mrs GAVISH SEGEV, Inbal
12:20	[24] Characterization of radiation damage effects in high-energy neutrino target graphite using low-energy ion irradiation	Mr BURLEIGH, Abraham
12:45	[3] Experimental investigation of radiation damage effects in beryllium: updates on recent results obtained on proton, neutron and He-ions irradiated samples	Dr KUKSENKO, Slava
13:10	Discussion
